| $\begin{array}{l}\text { (1) Mathematical Reasoning Students use mathematical } \\ \text { reasoning to analyze mathematical situations, make conjectures, } \\ \text { gather evidence, and construct an argument. }\end{array}$ |  | 5 items |
| :--- | :--- | :---: |
| A. | $\begin{array}{l}\text { use models, facts, and relationships to draw conclusions } \\ \text { about mathematics and explain their thinking }\end{array}$ | 24,28 |
| B. | $\begin{array}{l}\text { use patterns and relationships to analyze mathematical } \\ \text { situations }\end{array}$ | 30,45 |
| C. | justify their answers and solution processes | 47 |
| D. | $\begin{array}{l}\text { use logical reasoning to reach simple conclusions }\end{array}$ |  |
| (2) Number and Numeration Students use number sense and |  |  |
| numeration to develop an understanding of the multiple uses of |  |  |
| numbers in the real world, the use of numbers to communicate |  |  |
| mathematically, and the use of numbers in the development of |  |  |
| mathematical ideas. |  |  |$]$

| B. | develop strategies for selecting the appropriate computational and operational method in problem-solving situations | $\begin{gathered} 16,39 \\ 40 \end{gathered}$ |
| :---: | :---: | :---: |
| C. | know single digit addition, subtraction, multiplication, and division facts |  |
| D. | understand the commutative and associative properties | 46 |
|  | Modeling/Multiple Representation Students use thematical modeling/multiple representation to provide a ans of presenting, interpreting, communicating, and necting mathematical information and relationships. | 4 items |
| A. | use concrete materials to model spatial relationships | 43 |
| B. | construct tables, charts, and graphs to display and analyze real-world data |  |
| C. | use multiple representations (simulations, manipulative materials, and diagrams) as tools to explain the operation of everyday procedures |  |
| D. | use variables such as height, weight, and hand size to predict changes over time |  |
| E. | use physical materials, pictures, and diagrams to explain mathematical ideas and processes and to demonstrate geometric concepts | $\begin{gathered} 26,29, \\ 32 \end{gathered}$ |
|  | Measurement Students use measurement in both metric and glish measure to provide a major link between the tractions of mathematics and the real world in order to cribe and compare objects and data. | 7 items |
| A. | understand that measurement is approximate, never exact |  |
| B. | select appropriate standard and nonstandard measurement tools in measurement activities | 4 |
| C. | understand the attributes of area, length, capacity, weight, volume, time, temperature, and angle |  |
| D. | estimate and find measures such as length, perimeter, area, and volume using both standard and nonstandard units | 31 |

| E. | collect and display data | 48 |
| :---: | :---: | :---: |
| F. | use statistical methods such as graphs, tables, and charts to interpret data | $\begin{aligned} & 14,17 \\ & 21,38 \end{aligned}$ |
|  | Uncertainty Students use ideas of uncertainty to illustrate mathematics involves more than exactness when dealing h everyday situations. | 5 items |
| A. | make estimates to compare to actual results of both formal and informal measurement |  |
| B. | make estimates to compare to actual results of computations |  |
| C. | recognize situations where only an estimate is required |  |
| D. | develop a wide variety of estimation skills and strategies | 11,27 |
| E. | determine the reasonableness of results |  |
| F. | predict experimental possibilities | 34 |
| G. | make predictions using unbiased random samples |  |
| H. | determine probabilities of simple events | 5,44 |
| (7) dev ma pat | Patterns/Functions Students use patterns and functions to elop mathematical power, appreciate the true beauty of thematics, and construct generalizations that describe terns simply and efficiently. | 6 items |
| A. | recognize, describe, extend, and create a wide variety of patterns | 6,18 |
| B. | represent and describe mathematical relationships | 37 |
| C. | explore and express relationships using variables and open sentences | 23, 25 |
| D. | solve for an unknown using manipulative materials |  |
| E. | use a variety of manipulative materials and technologies to explore patterns |  |

| F. | interpret graphs |  |
| :---: | :--- | :---: |
| G. | explore and develop relationships among two- and three- <br> dimensional geometric shapes | 15 |
| H. | discover patterns in nature, art, music, and literature |  |
