Score: 2  The student made a conceptual error by using 8, the diameter, for the radius.
Question 37

37 The Rock Solid Concrete Company has been asked to pave a rectangular area surrounding a circular fountain with a diameter of 8 feet, as shown in the diagram.

Find the area, to the nearest square foot, that must be paved.

\[
\begin{align*}
\text{Area of the rectangle} & = 36 \times 15 = 540 \\
\text{Area of the circle} & = \pi \times 4^2 = 50.3 \\
\text{Total area} & = 540 - 50.3 = 490.3
\end{align*}
\]

Find the cost, in dollars, of paving the area if the Rock Solid Concrete Company charges $8.95 per square foot.

\[
490.3 \times 8.95 = 4388.185
\]

\[\text{Cost} = \$4388.19\]
