New York State Grade 8 Intermediate-Level Science Test June 2022

Performance Levels Chart and Conversion Chart for Determining a Student's Final Test Score

Note: Use for June 2022 test only.

The chart on the next page defines the four performance levels for this test. The State-designated level of performance for this test is a final score of 65 or higher (level 3 and 4). The chart provides the score intervals and a brief description of student abilities at each level.

The conversion chart is presented on the four pages following the performance levels chart. Be sure to use the correct portion of the chart. To determine the student's final test score, locate the student's raw score for the performance test across the top of the chart and the student's raw score for the written test down the left side of the chart. The point where those two raw scores intersect is the student's final test score. For example, a student receiving a performance test raw score of 33 and a written test raw score of 67 would receive a final test score of 80.

Note: Use for the June 2022 test only. Conversion charts provided for previous administrations of the Grade 8 Intermediate-Level Science Test must NOT be used to determine students' final scores for the 2022 administration of the test.
