TIPS FOR TAKING THE TEST

Here are some suggestions to help you do your best:

- Be sure to read carefully all the directions in the test book.
- Read each question carefully and think about the answer before writing your response.
- Be sure to show your work when asked. You may receive partial credit if you have shown your work.
- Use your calculator to help you solve the problems on this part of the test.

Book 2

Mathematics Reference Sheet

FORMULAS

	Circle	Area = πr^2 Circumference = $2\pi r$
S	Cube	Total Surface Area = $6s^2$ Volume = s^3
r h	Right Circular Cylinder	Total Surface Area = $2\pi rh + 2\pi r^2$ Volume = $\pi r^2 h$
h	Right Rectangular Prism	Total Surface Area = $2wl + 2lh + 2wh$ Volume = lwh
s w	Right Triangular Prism	Total Surface Area = $wh + lw + lp + ls$ Volume = $\frac{1}{2}wh \times l$
	Pythagorean Theorem	$c^2 = a^2 + b^2$

CONVERSIONS

1 centimeter = 10 millimeters	1 cup = 8 fluid ounces
1 meter = 100 centimeters = 1,000 millimeters	1 pint = 2 cups
1 kilometer = 1,000 meters	1 quart = 2 pints
	1 gallon = 4 quarts
1 gram = 1,000 milligrams	
1 kilogram = 1,000 grams	1 liter = 1,000 milliliters
	1 kiloliter = 1,000 liters
1 pound = 16 ounces	
1 ton = 2,000 pounds	

- -

To raise money for charity, Polly climbs the 1,776 steps in the CN Tower in Toronto, Canada. If it takes her 40 minutes to complete the climb, what is Polly's average rate in steps per minute?

Rate =	<u>Distance</u> Time
--------	-------------------------

31

Show your work.

Answer ______ steps per minute

32 Is the figure below a right triangle? On the lines below, explain how you determined your answer.

[not drawn to scale]

Type of Bread	Type of Meat					
White	Chicken					
Rye	Roast Beef					

SANDWICH CHOICES

In the space below, list all the possible sandwich combinations using 1 type of bread and 1 type of meat.

If Nick decides to add whole wheat bread as another bread option, how many possible sandwich combinations will there be?

Answer ______ sandwich combinations

Sara is sharing apples from her apple tree with her friends. She wants to create a circle graph to show the amount of apples given to each friend. The table below shows the percent of apples each friend receives and the angle measure for each sector of the circle graph.

Friend	Percent of Apples	Angle Measure (in degrees)			
Lori	5%	18°			
Donovan	35%	126°			
Melinda	20%	72°			
Avery	40%	144°			

Complete the circle graph below to show the data in the table.

Be sure to

- graph all the data
- label each sector

Red Kangaroo Heights (inches)															
40	57	72	78	62	67	73	66	71	60	56	52	48	51	44	79

Using the data in Melissa's table, complete the frequency table below to show the number of kangaroos in each of the indicated height ranges.

Height (inches)	Number of Kangaroos
40–49	
50–59	
60–69	
70–79	

RED KANGAROO HEIGHTS

Based on her study, Melissa claims that exactly $\frac{1}{4}$ of the red kangaroos are between 70 and 79 inches in height. On the lines below, explain whether her claim is correct.

35

Jerry plans to build a deck that is 189 square feet. What is the prime factorization of 189? Write your answer in exponential form.

Show your work.

Answer _____

Jerry wants his deck to be more than 6 feet wide. Using your result from above, write two possible sets of dimensions for Jerry's deck.

Answer 1. ______ feet by ______ feet

2. _____ feet by _____ feet

The city is building a new 1,815-meter long bicycle trail through the park. Two construction companies have submitted the proposals below for how many days it will take them to complete the job.

ARCUS CONSTRUCTION	JENNINGS CONSTRUCTION
Length of Trail: 1,815 meters Number of meters they will build per day: 48	Length of Trail: 1,815 meters Number of meters they will build per day: 96
Number of days to complete the job:	Number of days to complete the job:
1,815 ÷ 48 = <u>37.8</u>	1,815 ÷ 96 = <u>189.1</u>

One of the construction companies has made an error in calculation. Use **estimation** to find the number of days it will take each construction company to finish the job.

Show your work.

Estimation for Arcus Construction _____ days

Estimation for Jennings Construction _____ days

Based on your estimations, explain the error in calculation one of the companies made. Be sure to name the company.

[not drawn to scale]

What is the **total** surface area of the pillow? Round your answer to the nearest hundredth.

Show your work.

Answer ______ square inches

If Chris shortens the length of the pillow from 15 inches to 12 inches, how much **less** fabric will she need? Round your answer to the nearest hundredth.

Show your work.

Answer ______ square inches
